Lone Star is looking for a mid-level financial quantitative analyst.

This is an excellent opportunity for an aspiring professional to rapidly advance in an expanding company. If you feel you can be a leader and help improve our company in every way, please apply. We are not looking for clock puncher, job hopper or someone just looking for a “job”, but rather a creative and driven person who wants to advance themselves and gain the satisfaction of being part of a team that desires to deliver the best products and services in the market.

Lone Star is a manufacturer and service company for low pressure compressor technologies with operations around the world. We have a high paced, but casual work environment that is family friendly and flexible.

We are looking for a Financial Quantitative Analyst to work within our finance department to help guide Lone Star grow into next stage. You will be responsible for driving timely and effective financial reporting and analytics. You will also identify actionable insights, suggest recommendations and influence the direction of finance operation of the company.

Responsibilities

- Financial Review and Projection. Prepare monthly, quarterly, and annual evaluation reports.
- Conduct income/expense and cash flow projections using quantitative predictive models.
- Budget Planning Support. Apply expertise in financial data analysis to assist annual budget planning.
- Conduct financial scenario evaluations of financial needs, cost allocation and available funds by building and delivering resource optimization models.
- Internal Control Optimization. Analyze A/R, inventory and A/P turnover ratios to ensure Lone Star is effectively utilizing working capital based on company targets.
- Investigate questionable financial activities/conditions and recommend risk management solutions
- ERP Customization and visualization. Automate core accounting and supply chain processes
- Perform ad-hoc analysis utilizing financial models and BI analytical tools

Minimum Qualification

- BA/BS in Accounting, Finance, Economics, or Statistics, with emphasis on coursework of a quantitative nature (required)
- 3+ years' experience doing quantitative analysis
- Very strong analytical ability including extensive experience developing complex Excel models
- Experience in manipulating data sets through statistical software (eg. R, SAS) or other methods
- Experience in creating customized reports out of ERP system
- Ability to understand financial statements and accounting principles
- Experience with financial forecasting and budgeting
- Experience working with relational databases, regression analysis and financial modes in in any statistics analysis language (R, Python, SAS, Stata)
- An experienced professional with manufacturing industry experience will be a really great plus

Job Type: Full-time

Work Location: 8883 West Monroe Road, Houston, Texas 77061

Lone Star is an Equal Opportunity Employer

Interested candidates must submit their resume or questions via email ONLY. We will make the hire immediately after finding the right candidate.
