Press Release 7/1/17

Lone Star Blower will exhibit at WEFTEC 2017 www.weftec.org as an exhibitor in Chicago on October 2,3,4 in booth 2058. Come by our booth to see why Lone Star is the most rapidly growing blower manufacturer in world.

Four Firsts! Lone Star offering geared, gearless and multistage turbo blowers is an industry first by itself. Presenting all these technologies on a “wire to air” basis per the new ASME PTC-13 power test code is also an industry first. With PTC-13, we now have the ability to show how efficient our technologies have become and for the first time have a real comparison between technologies. Our customers will have a real expectation of how much kw will actually be used at their location and conditions specified for the first time.

Experience Matters! Lone Star was founded by 20 year veterans in the industry. As Lone Star, our product lines have an established installed base for each product as follows: 340 Units of Geared Turbos over 10 years, 3,300 Units of Gearless Turbos over 10 years and 175 Units of Multistage Turbos over 3 years.

USA Manufacturing: Lone Star manufactures both our geared and multistage turbo blowers right here in the USA with a complete compliant test stand for any industry specification.

Lone Star Blower, Inc. is a Manufacturer and Service company for blower and blower control systems. Products include gear driven single stage turbo blowers with variable inlet and discharge guide vanes, gearless high speed turbo blowers, and vertically split multistage turbo blower technologies serving the industries of Water and Wastewater, Power, Petro-Chemical, Oil and Gas, Food and Beverage, Mining, and many others using compressed air or gas, pressure or vacuum applications.
