

BLOWER AND COMPRESSOR

Lone Star Knows Carbon Capture Utilization & Storage

Wet CO₂ Gas applications require engineered coatings, materials, and sealing for a reliable and stable operation. Lone Star specializes in gas applications and designed our LS & MC Series Multistage Blowers to be the most advanced in the market, offering the highest pressure and widest flow range with enhanced reliability.

- Discharge Pressure >30 PSIG
- Up to 4,000 hp & 40,000 CFM
- Stainless Steel Rotating Assemblies
- Special Coatings
- O-Ring Casing Seals
- Purged Seals
- Bearing Cooling Systems

Complete packages from Lone Star can include motor driver, motor, VFD/Starter, PLC controls as well as accessories to offer an engineered and tested package solution.

Carbon Capture Applications

- Carbon Dioxide Capture
- Carbon Dioxide Storage
- CO₂ Compression
- CO₂ Stripping
- CO₂ Treatment
- CO₂ Liquefaction
- Point Source Capture
- Direct Air Capture
- CO₂ Separation & Processing
- CO₂ Transport
- CO₂ Storage
- CO₂ Usage
